ITALY.

LIST OF ARTICLES THE EXPORTATION OF WHICH IS PROHIBITED.

September 13, 1915.

NOTES.

(1) *Re-exportation*.—The prohibition of exportation covers re-exportation from warehouse or in discharge of "temporary admission" permits.—*Decree of August 6, 1914.*

(2) *Transit*.—Merchandise, the exportation of which is prohibited, cannot be re-exported to foreign countries under process of transit or transshipment if it has arrived in an Italian port with bills of lading indicating Italy as the original destination, or if there is no clear indication of destination.

For this purpose, consignments provided with bills of lading "to order," not indicating by name a foreign (non-Italian) destination, and those having only bills of lading "to bearer," will be considered as destined for the internal use of the State (i.e., in Italy).—*Decree of November 13, 1914.*

(3) *Exceptions* to the prohibitions of export noted on pages 1639 to 1648 may be made by the Minister of Finance with the approval of the President of the Council of Ministers and of the Ministers of Agriculture, Industry and Commerce.—*Decree of August 1, 1914.*

(4) A Royal Decree of the 10th June, 1915, prohibited the exportation of articles made wholly or in part from raw material of which the exportation is prohibited or from the products of such materials. His Majesty's Ambassador at Rome reported on the 4th July that the Italian Minister of Finance had issued the Italian Customs authorities explanatory

instructions with regard to this Decree, from which it appears that, while the absolute prohibition of exportation of all products and manufactures which can serve for military equipment (imposed by the Royal Decree of the 1st August, 1914) still remains in force, the Customs authorities are on their own initiative to apply the regulations contained in the Decree of the 10th June to the products or manufactures which come under the following categories:—

1. Goods of all kinds manufactured with *metals* of which the export is prohibited (*e.g.*, copper, tin, zinc, etc.);
2. Articles made with *gutta-percha* and *india rubber*;
3. Newspaper paper in rolls;
4. *Medicines and chemical products* any of the ingredients of which are materials of which the export is prohibited, or such products which are in any way prepared by the use of prohibited materials;
5. Products made from *mineral oils, fats, soaps, and fatty and lubricating materials*;
6. *Colouring material* containing aniline colours and salts.

As necessity arises, the Ministry of Finance will issue instructions to the Customs in regard to goods which are not comprised in the above-mentioned categories, but in regard to which it is considered necessary to apply the principles of the Decree of the 10th June.

(5) *Liquid fuels Transport by Sea, etc.*—A Decree of the Lieutenant-General, dated the 18th July, 1915, lays down regulations governing the transport of liquid fuels by sea, and providing for Government supervision in respect of stocks of such materials.

Article 1 of the Decree prohibits until further notice the carriage from the ports, roadsteads, and territorial waters of Italy, of the Italian Colonies, and of the territories occupied by Italy, in any ship, boat, steamer, or other craft, under any flag, of the following goods, however prepared or packed, *viz.*, vegetable oils, animal oils, crude and distilled mineral oils, naphtha, petroleum of all kinds, benzine (petrol) nitro-benzine, alcohol, and, in general, all essences (*essenze*) capable of being used in motors. No restriction, however, is imposed on the exportation of vegetable oils, so far as such export has been duly authorised in accordance with the regulations now in force.

Certain modifications of this general prohibition are provided for in Articles 2 and 3 (coastwise carriage, replenishing of stocks in Colonies, etc.).

Articles 4—7 of the Decree deal with the measures taken to obtain information as to stocks of liquid fuel, and the measures of surveillance in respect of such stocks.
